Portfolio: portfolio.r-r-kabilan0435.workers.dev

PROFESSIONAL SUMMARY

Backend & Cloud Developer with experience designing, building, and deploying scalable backend applications, automation solutions, and AI-powered systems. Proficient in developing secure REST APIs, cloud-native services, real-time communication platforms, and database-driven applications using Python and modern software engineering practices. Committed to delivering reliable, maintainable, and production-ready software while continuously advancing expertise in cloud technologies, distributed systems, and scalable backend architecture.

TECHNICAL SKILLS

Programming: Python, Bash, JavaScript, SQL

Web Frameworks: FastAPI, Flask, Django, React.js, Node.js, Next.js

Databases: MySQL, PostgreSQL, SQLAlchemy, Chroma DB, SQLite, MongoDB

Cloud & Infrastructure: AWS, Docker, Railway, Render, Vercel, Alembic

Systems & Tools: Linux, Git, BeautifulSoup, Playwright, Recharts, Pandas, React Query, wweb.js

APIs & Securities: Socket.IO/WebSockets, Google OAuth, JWT Auth, GitHub Webhooks

Core Competencies: RAG, REST API Design & Architecture, Database Modeling & Schema Design, SSE, Web Scraping & Data Extraction, System Monitoring & Logging

PROJECTS

ExpenseTracker - Personal Finance Platform

Technologies: Python, FastAPI, Neon DB, React.js, JWT Authentication, wweb.js

- Built with a FastAPI backend, Neon DB database, and a modern React frontend dashboard.
- Easily record, categorize, and filter your daily expenses and income streams in real-time.
- Set custom budgets, track savings goals, and manage upcoming recurring subscriptions or debt EMIs.
- Generate visual charts, audit logging events, and export financial data to external formats.
- Log expenses on the go by texting natural language commands to a connected bot via Telegram.

Automated GitHub-to-JIRA Ticketing System

Technologies: Python, Flask, AWS EC2, IAM, CloudWatch, GitHub Webhooks, JIRA API

- Designed and deployed a Flask-based REST API on AWS EC2 to automatically convert GitHub issue events into structured JIRA tickets.
- Integrated GitHub Webhooks with JIRA API to enable real-time cross-platform issue synchronization.
- Implemented IAM role-based access control to ensure secure cloud operations.
- Configured centralized logging and monitoring using AWS CloudWatch for debugging and operational visibility.
- Eliminated repetitive manual ticket creation by automating cross-repository workflow synchronization.
- Structured the application using modular backend design principles to improve maintainability and scalability.

GitHub: github.com/kabilannadar/flask_jira

EnGame – Full Stack Gaming Platform (Academic Team Project)

Technologies: React.js, Next.js, Node.js, MongoDB, OAuth

- Led backend coordination within a 3-member development team.
- Designed authentication and authorization flow using OAuth.
- Contributed to API handling and MongoDB schema integration.
- Participated in system design planning and deployment discussions.

GitHub: github.com/kabilannadar/EnGame

PROFESSIONAL EXPERIENCE

Software Developer

Aurify Systems Pvt. Ltd. | Mar 2025 – Dec 2025

- Diagnosed and resolved backend service and system-level issues to ensure application reliability and consistent production uptime.
- Assisted in deployment and configuration of backend services across Linux-based environments, supporting stable production releases.
- Designed and implemented Python-based automation scripts to streamline operational workflows and reduce manual intervention.
- Improved backend maintainability by enhancing technical documentation, logging, and monitoring processes.
- Reduced recurring backend issue reports by standardizing root-cause analysis procedures and implementing structured resolution workflows.

Software Developer Intern

Sellergize Web Technologies Pvt. Ltd. | Jul 2024 – Nov 2024

- Developed Python-based validation utilities to process and verify crawler-generated backend data used in production systems.
- Implemented structured validation logic to analyze backend datasets and identify inconsistencies, improving data reliability.
- Assisted in debugging data-processing workflows by tracing issues across backend services and isolating root causes.
- Collaborated with backend developers to understand service logic and improve data validation mechanisms.
- Strengthened system stability by identifying edge cases and refining backend data handling processes.

EDUCATION

BSc Computer Science

SIES College of Arts, Science and Commerce, Mumbai | 2021 – 2024

CGPA: 8.28 / 10

LANGUAGES

- English
- Hindi
- Tamil
- Marathi
