

KABILAN RETHINASWAMY

Backend & Cloud Developer | Chennai, Tamil Nadu

r.r.kabilan0435@gmail.com | [+91-9022879379](tel:+91-9022879379) | Portfolio: portfolio.r-r-kabilan0435.workers.dev

GitHub: github.com/kabilannadar | LinkedIn: linkedin.com/in/kabilan-nadar-9738a823a

PROFESSIONAL SUMMARY

Backend & Cloud Developer with experience designing, building, and deploying scalable backend applications, automation solutions, and AI-powered systems. Proficient in developing secure REST APIs, cloud-native services, real-time communication platforms, and database-driven applications using Python and modern software engineering practices. Committed to delivering reliable, maintainable, and production-ready software while continuously advancing expertise in cloud technologies, distributed systems, and scalable backend architecture.

TECHNICAL SKILLS

Programming: Python, Bash, JavaScript, SQL

Web Frameworks: FastAPI, Flask, Django, React.js, Node.js, Next.js

Databases & ORM: MySQL, PostgreSQL, SQLAlchemy, Chroma DB, SQLite, MongoDB

Cloud & Infrastructure: AWS, Docker, Railway, Render, Vercel, Alembic

Systems & Tools: Linux, Git, GitHub, Playwright, BeautifulSoup, Pytest, Pandas

APIs & Securities: REST APIs, Socket.IO/WebSockets, Google OAuth, JWT, GitHub Webhooks

AI / ML: RAG, Vector Embeddings, Semantic Search, PyTorch, Hugging Face, Sentence Transformers, LLM

Core Competencies: REST API Design & Architecture, Database Modeling & Schema Design, Real-time Event Streaming (SSE), Web Scraping & Data Extraction, API Rate Limiting & Security, System Monitoring & Logging

PROFESSIONAL EXPERIENCE

Software Developer

Aurify Systems Pvt. Ltd. | Mar 2025 – Dec 2025

- Resolved backend and system-level issues, improving application reliability and maintaining consistent production uptime across services.
- Deployed backend services across Linux environments and developed Python automation scripts to streamline operational workflows.
- Improved documentation, logging, monitoring, and root-cause analysis processes to reduce recurring backend issues.

Software Developer Intern

Sellergize Web Technologies Pvt. Ltd. | Jul 2024 – Nov 2024

- Developed Python validation utilities to process and verify crawler-generated backend data used across production systems.
- Implemented structured validation logic to identify inconsistencies in backend datasets and improve overall data reliability.
- Debugged data-processing workflows by tracing issues across backend services, collaborating with developers, and refining data handling.

PROJECTS

MoneyCommandAI Assistant - AI-Powered Finance & Budget Assistant

Technologies: Python, FastAPI, LLM, RAG, ChromaDB, Hugging Face Embeddings, Prompt Engineering

- Built and deployed a conversational finance assistant using intent detection, prompt engineering, and LLM integration for context-aware responses.
- Developed a RAG pipeline using LLMs, Hugging Face embeddings, ChromaDB vector search, document ingestion, and contextual prompting.
- Implemented real-time agent-user support using Socket.IO/WebSockets with session management, message routing, and connection state.
- Implemented JWT-based role-based authentication and authorization for users, support agents, and administrators across ExpenseTracker and chatbot integrations.

ExpenseTracker - Personal Finance & Budget Tracker

Technologies: Python, FastAPI, Neon DB, React.js, JWT Authentication

- Built and deployed a full-stack finance platform using React and FastAPI with JWT authentication, Google Sign-In and email authentication.
- Integrated MoneyCommandAI Assistant for natural-language financial queries and transaction management.
- Implemented automated Telegram and email notifications for budgets, EMIs, subscriptions, and scheduled reminders.
- Developed a PWA with offline support for Android, iOS, and desktop installations.

Automated GitHub-to-JIRA Ticketing System

Technologies: Python, Flask, AWS EC2, IAM, CloudWatch, GitHub Webhooks, JIRA API

- Designed and deployed a Flask REST API on AWS EC2 to automatically convert GitHub issues into structured JIRA tickets.
- Integrated GitHub Webhooks, JIRA API, IAM, and CloudWatch for secure synchronization, monitoring, and operational visibility.
- Automated cross-repository ticket workflows using modular backend architecture to reduce manual effort and improve maintainability.

EDUCATION

BSc Computer Science

SIES College of Arts, Science and Commerce, Mumbai | 2021 – 2024 | CGPA: 8.28 / 10

LANGUAGES

English | Tamil | Hindi | Marathi
